Getty Images and Alamy

Scanning technology as recommended by Getty Images
and leading publishing companies

RAW CONVERSIONS

- Specialist RAW conversions and Meticulous colour correction using the latest Adobe, Capture One and Leaf software

BASIC CLEANING TO COMPLEX RETOUCHING OF STILLS IMAGES

Basic Tasks for Image Libraries

- Cleaning dust, scratches and debris from images
- Dot-screen removal
- Cropping and rotation where necessary - Especially relevant for art gallery and museum images
- Minor corrections of imperfections, such as simple colour balancing (removing colour casts)
- Removal of logos and other unwanted objects from images
- Cut-outs, placing objects on a white background with clipping paths, masks and a holding shadow
- Colour Tinting of archival images

Complex Retouching for Demanding Creators of Lifestyle Fashion and Advertising Images

- Lifestyle, Fashion and Beauty retouching
- Meticulous RAW conversion and colour work
- Complex retouching including multi-part comps
- Product shot retouching

IMAGE QC AND PREPARATION FOR LIBRARY SUBMISSION

We can QC and if/where necessary retouch and correct your photographic or illustration images, to ensure they conform to a specific image library criteria.

By combining this with our keywording service, clients can effectively eliminate wasting money keywording images which are subsequently rejected due to poor image quality.

SCANNING

We offer an archive cataloguing service, which can be a useful first step to planning a digitisation program, for your archive.

We run a fully equipped scanning facility using high end scanning equipment

- Hasselblad Flextight X5 - approved by Getty Images for High-Resolution Scanning
- Fuji Lanovia Quattro - approved by Getty Images for High-Resolution Scanning
- Nikon SuperCoolScan 9000ED
- We can scan in RGB, grayscale, CMYK, or Hasselblad RAW (3f), depending on your requirements.

Features of our scanning facility include:

- Secured entry
- Controlled environment to minimise dust
- Suitable storage for delicate originations
- Highly trained scanning operators, experienced in handling all formats, including archival origination
- EasyResource are fully insured to store and handle origination on site.

We are also covered for general liability insurance, which some clients require of their suppliers
